TIME:..... DATE:.....

**Information**

Lake Ross is located a short drive (about 14 km) from Townsville/Thuringowa Central. Owned by NQ Water, Lake Ross stores over 200,000 million litres of water and supplies up to 80% of the region's potable water supply. The dam wall stretches 8.3 km across the Ross River floodplain providing an additional flood mitigation benefit to the downstream community.

In recognition of its habitat values, Lake Ross is listed as a Wetland of National Significance. The extensive shallow margins of the lake provide habitat for a diversity of water birds. The lake is also surrounded by thousands of hectares of unspoiled open savannah teeming with wildlife. Over 220 species of bird have been recorded on or around the lake to date.

**Access**

Access to Lake Ross is via Riverway Drive, Kelso. The dam wall is currently being upgraded, so access to Lake Ross and the dam wall is restricted until construction activities are completed in early 2008. Members of the public are reminded not to enter the construction site for safety reasons.

Ross Park, located immediately below the dam wall, has ample parking, picnic and toilet facilities. Many birds can be seen along the Ross River and the *Townsville Region Bird Observers Club* hosts early morning bird-watching walks generally on the 3rd Sunday of each month from this location.

Three local Eco-tourism operators have access to the Lake and surrounding woodlands. They are :-

- Pop Sullivan Tours and Cruises (Boat Cruises): 0407 167 524*
- NQ River 'n' Road Tours (Kayaking and 4WD): 0418 758 256*
- Townsville Tropical Tours (4WD & Birdwatching): 0427 216 489*

Check local guides for details.

**To report unlisted or unusual sightings, please phone; or mail your completed lists to:-**

Marleen Acton  
 Townsville Region Bird Observers Club  
 PO Box 756 Townsville Q 4810
